

RO's $<, >, ==, !=, <=, >=$

Single equal is assignment operator:-

if $(7 < 5) \Rightarrow (T \text{ or } F)$

• output

int $x = 6;$

int $y = 5;$

boolean result = $x < y \Rightarrow \text{false}$

$x > y \Rightarrow \text{true}$

$x != y \Rightarrow \text{true}$
